

**Alicia Cruzat Olavarrieta,  
Professor**  
**Bonding Human Design:  
Understanding of  
Togetherness from a  
Naturalistic Integrative  
Approach**

This presentation shows us of the efforts of a Chilean therapist to understand the nature of human relational design. Just as the journey made by Darwin through the Patagonia and Chilean coast, the speaker describes the professional, personal and theoretical travel developed to understand the depth of the tendency of human beings to engage and maintain in emotional connection with others such as Bowen points out.
