

Kent E. Webb, LCSW, PCC **The Murray Bowen Archives Project**

On a separate matter, the board of directors of The Murray Bowen Archives Project is interested in beginning a dialogue with the conference organizers about having a presence at the Conference.

Some of our thoughts include perhaps, TMBAP hosting a reception or cocktail hour during which we would highlight the work and future of the Project, or to make a 20 minute presentation at the conference to highlight the archives project and our work with the U. S. National Library of Medicine and most importantly, to inform others about how research and scholarship can be accomplished using Dr. Bowen's archives. Please let me know how we might proceed.
